

N Ohio St Bridge Over I-66

BEFORE TREATMENT

Facing North

Facing South

Safety Issue: This project was identified through community-reported concerns and selected for a project due to its proximity to Cardinal and Arlington Traditional Elementary Schools.

Project Description: The addition of buffered bike lane pavement markings across the N Ohio St bridge over I-66 (between 14th St N and 12th Rd N). This project ensures a continuous bike lane along N Ohio St, adds additional separation between bikes and vehicles across the bridge, and reduces vehicle lane width to encourage lower speeds.

Completed: January 2022
