

Subject: Headway on the 16M

**FY 2023 Proposed Budget
Budget Work Session Follow-up**

3/15/2022

The following information is provided in response to a request made by Mr. Karantonis at the work session on 03/03/2022, regarding the following question:

What is the headway on the 16M?

When the service is launched in spring 2023, the 16M will start with 6-minute peak period and 12-minute off peak headways (time between consecutive buses). The intent is to expand mid-day and evening frequency over time as additional transit facility infrastructure in the Columbia Pike and Pentagon City corridors is completed. This service expansion will need to be coordinated with WMATA (the service provider for the 16M) and Fairfax County.
