Wood Joinery Nantucket® Collection

BEST DURABILITY

Simpson® Nantucket® Collection doors are the toughest wood doors available.

All the components of the Nantucket door are solid wood. The stiles and rails utilize a two-piece laminated construction, resulting in a straighter and more stable stile.

Innerbond® panels are created with offsetting grain patterns to provide extra strength to resist warping and splitting.

The Nantucket® door is joined with a modified mortise-and-tenon. A large mortise is cut into both the stile and rail.

Glue is added to the mortise of the stile and a tenon is inserted.

Additional glue is added to the stile and along the entire coped area.

Then the stiles and rails are assembled together.

A wood pin is driven into the face of the door to join the components together. The result is a unique beauty and durability that is only found in the Nantucket Collection.

10

For more information on the Nantucket Collection visit learn.reeb.com/simpson-nantucket-collection-doors/

In addition to advanced durability they have exquisite detail and feature a flat or double hip raised panel and have the choice to include a variety of glass options.

Flat Panel

Raised Panel

Douglas Fir

Sapele Mahogany

Made from wood that is naturally moisture-resistant, Nantucket® doors are stocked by Reeb in 2 species: Douglas Fir and Sapele Mahogany.

They feature a 10 year limited warranty and can be used in any exposure with no overhang required.

F7712 in Douglas Fir
See Page 41 for details

The Nantucket® Collection features the best durability possible with an unmatched character that can only be found in real wood. These doors will retain their rugged beauty and last for years, regardless of what nature sends their way. You can find Nantucket doors on pages 21, 41, 54, 57, 60, 64, 75, 79 and 82.
