11. WB Langston Blvd at N Lynn St – **Ticketing begins Sept 1, 2024**
12. WB Wilson Blvd at N Lynn St and NB N Lynn St at Wilson Blvd – **Ticketing begins Oct 3, 2024**
13. WB Langston Blvd at EB I-66 Exit 72 Offramp – **Ticketing begins Oct 3, 2024**

*NB: Northbound | SB: Southbound | EB: Eastbound | WB: Westbound
See PhotoRED locations on a map on the following page of this info sheet.*

What is a red-light safety camera?

- Red-light safety cameras detect and record images of vehicles that run red-lights at intersections with a traffic signal.
- These cameras are a safety tool, as they decrease red-light running and reduce serious injury crashes at intersections.
- Red-light safety cameras have been found to reduce all injury crashes up to 25%.

How do red-light camera tickets work?

- Warning signs are posted 500 ft. ahead of the camera.
- The camera records video and takes photos when a vehicle enters the intersection after the light turns red.
- Potential violations are reviewed by a law enforcement officer, who issues a ticket to the registered owner of the vehicle if a violation occurred.
- A red-light camera ticket is a \$50 fine.
- A ticket does not add driver license points or affect insurance.
