§ 20-9 Certain Solar Facilities and Certified Solar Energy Equipment, Facilities, or Devices Exemption.

A. Certain solar facilities a separate class of property for taxation. Any solar facility installed pursuant to subsections A or B of Virginia Code § 15.2-2288.7 with a nameplate rated electrical generating capacity measured in direct current kilowatts of not more than 25 kilowatts is hereby declared to be a separate class of property and shall constitute a classification for local taxation separate from other classifications of real or personal property. Such facilities shall be wholly exempt from local taxation pursuant to Article X, § 6 (d) of the Constitution of Virginia.

B. Certified solar energy equipment, facilities, or devices a separate class of property for taxation. Certified solar energy equipment, facilities, or devices, as defined herein, are hereby declared to be a separate class of property and shall constitute a classification for local taxation separate from other classifications of real or personal property.

C. Definitions. As used in this section:

"Certified solar energy equipment, facilities, or devices" means any property, including real or personal property, equipment, facilities, or devices, excluding any portion of such property that is exempt under Virginia Code § 58.1-3660, certified by the County Building Official to be designed and used primarily for the purpose of collecting, generating, transferring, or storing thermal or electric energy.

"Local tax rate" means the real estate property tax rate.

D. Certification. Any person residing in the county may proceed to have solar energy equipment, facilities, or devices certified as exempt from taxation by applying to the County Building Official. If, after examination of such equipment, facility, or device, the County Building Official determines that the unit primarily performs any of the functions set forth in subsection C and conforms to the requirements set by regulations of the State Board of Housing and Community Development, the County Building Official shall approve and certify such application. The County Building Official shall forthwith transmit to the County Director of Real Estate Assessments those applications properly approved and certified by the County Building Official as meeting all requirements qualifying such equipment, facility, or device for exemption from taxation. Any person aggrieved by a decision of the County Building Official may appeal such decision to the local board of building code appeals, which may affirm or reverse such decision.

E. Exemption generally. Upon receipt of the certificate from the County Building Official, the County's Director of Real Estate Assessments shall proceed to determine the value of such qualifying solar energy equipment, facilities, or devices. The exemption provided by this section shall be determined by applying the local tax rate to the value of such equipment, facilities, or devices and subtracting such amount either (i) from the total real property tax due on the real property to which such equipment, facilities, or devices are attached or (ii) if such equipment, facilities, or devices are taxable as machinery and tools under Virginia Code § 58.1-3507, from the total machinery and tools tax due on such equipment, facilities, or devices, at the election of the taxpayer. This exemption shall be effective beginning in the next succeeding tax year and shall be permitted for a term of five years. In the event the County assesses real estate pursuant to Virginia Code § 58.1-3292, the exemption shall be first effective when such real estate is first assessed, but not prior to the date of such application for exemption. In the event no real property tax is due, this exemption shall not apply and shall not be interpreted to result in a payment from the County to the taxpayer.

F. Valuation. It shall be presumed for purposes of the administration of this section, and for no other purposes, that the value of such qualifying solar energy equipment, facilities, and devices is not less than the normal cost of purchasing and installing such equipment, facilities, and devices.

A. All new buildings substantially completed or fit for use and occupancy shall be assessed when substantially completed or fit for use and occupancy, and the Director of the Department of Real Estate Assessments shall enter in the books the fair market value of such building. The total tax on any such new building for that year shall be the sum of:

1. The tax upon the assessment of the completed building, computed according to the ratio which the portion of the year such building is substantially completed or fit for use and occupancy bears to the entire year; and
2. The tax upon the assessment of such new building as it existed on January 1 of that assessment year, computed according to the ratio which the portion of the year such building was not substantially complete or fit for use and occupancy bears to the entire year.

With respect to any assessment made under this section after November 1 of any year, no penalty for nonpayment shall be imposed until the last to occur of (i) December 5 of such year or (ii) 30 days following the date of the official billing.

B. Levies on buildings which are razed, or destroyed or damaged by a fortuitous happening beyond the control of the owner, shall be abated. No such abatement, however, shall be allowed if the destruction or damage to such building shall decrease the value thereof by less than five hundred dollars (\$500.00). No such abatement shall be allowed unless the destruction or damage renders the building unfit for use and occupancy for thirty days or more during the calendar year. The tax on such razed, destroyed or damaged building is computed according to the ratio which the portion of the year the building was fit for use, occupancy and enjoyment bears to the entire year. Application for such abatement shall be made by or on behalf of the owner of the building within six (6) months of the date on which the building was razed, destroyed or damaged.
